CONTENTS TO VOLUME 85

PART 1 7 MARCH 1978

A one-dimensional piston problem of gasdynamics. R. McLAUGHLIN *page* 1

On the shape and breaking of finite amplitude internal gravity waves in a shear flow. S. A. THORPE 7

Wall region of a relaxing three-dimensional incompressible turbulent boundary layer. K. S. HEBBAR and W. L. MELNIK 33

Measurements and prediction of fully developed turbulent flow in an equilateral triangular duct. A. M. M. ALY, A. C. TRUPP and A. D. GERRARD 57

Propagation of perturbations in a gas–liquid mixture. V. V. KUZNETSOV, V. E. NAKORYAKOV, B. G. POKUSAEV and I. R. SHREIBER 85

The multiple-scale cumulant expansion for isotropic turbulence. TOMOMASA TATSUMI, SHIGEO KIDA and JIRO MIZUSHIMA 97

On the interactions of slender ships in shallow water. RONALD W. YEUNG 143

The behaviour of naturally oscillating three-dimensional flow around a cylinder. CLAUDE TOURNIER and BERNARD PY 161

Visual observations of the flow past a sphere at Reynolds numbers between 10^4 and 10^6. S. TANEDA 187

The inertial damping and resonance of cellular convection in a rotating fluid annulus: steady linear theory. P. G. DANIELS 193

PART 2 21 MARCH 1978

The rheology of suspensions of charged rigid spheres. WILLIAM B. RUSSEL 209

Random advection of chemically reacting species. RONALD E. MEYERS, EDWARD E. O'BRIEN and L. RIDGWAY SCOTT 233

Wave forces on vertical bodies of revolution. J. D. FENTON 241

Similarity transformations for the two-dimensional, unsteady, stream-function equation. BRIAN J. CANTWELL 257

The structure of turbulent boundary layers along mildly curved surfaces. B. R. RAMAPRIAN and B. G. SHIVAPRASAD 273

Numerical simulation of helical magnetohydrodynamic turbulence. A. POUQUET and G. S. PATTERSON 305

The Wiener–Hermite expansion applied to decaying isotropic turbulence using a renormalized time-dependent base. H. D. HOGGE and W. C. MEECHAM 325

Vapour-bubble growth in a superheated liquid. ANDREA PROSPERETTI and MILTON S. PLESSET 349

Velocity characteristics of the flow in the near wake of a disk. D. F. G. Durão and J. H. Whitelaw *page* 369

Reversal of secondary flow in non-Newtonian fluids. S. Rosenblat 387

Part 3 13 April 1978

Radial source flow between parallel disks. J. D. Raal 401

Experiments on strong interactions between solitary waves. P. D. Weidman and T. Maxworthy 417

The structure of the Stewartson layers in a gas centrifuge. Part 1. Insulated end plates. Takuya Matsuda and Kiyoshi Hashimoto 433

The structure of the Stewartson layers in a gas centrifuge. Part 2. Insulated side wall. Takuya Matsuda and Hidenori Takeda 443

Towards an optimum yacht sail. C. J. Wood and S. H. Tan 459

Flow between a stationary and a rotating disk with suction. Lynn O. Wilson and N. L. Schryer 479

Laser anemometer study of flow development in curved circular pipes. Y. Agrawal, L. Talbot and K. Gong 497

Supersonic flow of a vibrationally relaxing gas past a circular cone. James Kao and J. P. Hodgson 519

Wind-wave generation by energy and momentum flux to the forced components of a wave field. Dieter E. Hasselmann 543

The 'Hurst phenomenon' in grid turbulence. K. N. Helland and C. W. Van Atta 573

A universal Strouhal number for the 'locking-on' of vortex shedding to the vibrations of bluff cylinders. Owen M. Griffin 591

Reviews

Variability of the Oceans, by A. Monin, V. M. Kamenkovich and V. G. Kort 607

Fundamentals of Ocean Dynamics, by V. M. Kamenkovich 607

Part 4 27 April 1978

Numerical solutions and laser-Doppler measurements of spin-up. Alex Warn-Varnas, William W. Fowlis, Steve Piacsek and Sang Myung Lee 609

Experimental study of the velocity field in Rayleigh–Bénard convection. M. Dubois and P. Bergé 641

Bubble plumes in stratified environments. Trevor J. McDougall 655

Bulk stresses due to deformation of the electrical double layer around a charged sphere. William B. Russel 673

On vortex sound at low Mach number. W. Möhring *page* 685

Effect of free-stream turbulence on large structure in turbulent mixing layers. C. Chandrsuda, R. D. Mehta, A. D. Weir and P. Bradhsaw 693

The growth of duration-limited wind waves. Hisashi Mitsuyasu and Kunio Rikiishi 705

Slip flow past a tangential flat plate at low Reynolds numbers. Ko Tamada and Hiroyuki Miura 731

Magnetic instabilities of a rotating gas. D. J. Acheson and M. P. Gibbons 743

Stability of the Stewartson layer in a rapidly rotating gas. Kiyoshi Hashimoto 759

Theory of the almost-highest wave. Part 2. Matching and analytic extension. M. S. Longuet-Higgins and M. J. H. Fox 769

Wilson Cloud formation by low-altitude nuclear explosions. R. E. Waltz 787

CONTENTS TO VOLUME 86

PART 1 15 MAY 1978

Laminar throughflow between closely spaced rotating disks. A. Z. SZERI and M. L. ADAMS *page* 1

Shock waves at a fast–slow gas interface. A. M. ABD-EL-FATTAH and L. F. HENDERSON 15

Theory of vortex nutation and amplitude oscillation in an inviscid shear instability. AKIRA MIURA and TETSUYA SATO 33

The heat/mass transfer to a finite strip at small Péclet numbers. R. C. ACKERBERG, R. D. PATEL and S. K. GUPTA 49

The fine-scale structure of the turbulent velocity field. F. H. CHAMPAGNE 67

Particle motions near the bottom in turbulent flow in an open channel. B. MUTLU SUMER and BEYHAN OĞUZ 109

Extended Stokes series: laminar flow through a loosely coiled pipe. MILTON VAN DYKE 129

Experiments on centrifugally driven thermal convection in a rotating cylinder. J. L. HUDSON, DANIEL TANG and STEVEN ABELL 147

Symmetrical flow past a double wedge at high subsonic Mach numbers. JEAN-JACQUES CHATTOT 161

Kinematical studies of the flows around free or surface-mounted obstacles; applying topology to flow visualization. J. C. R. HUNT, C. J. ABELL, J. A. PETERKA and H. WOO 179

A note on the conservation of the volume flux in free turbulence. N. E. KOTSOVINOS 201

REVIEW

Dynamics of Polymeric Liquids. Volume 1. *Fluid Mechanics, by R. B. Bird, R. C. Armstrong and O. Hassager. Volume* 2. *Kinetic Theory, by R. B. Bird, O. Hassager, R. C. Armstrong and C. F. Curtiss* 204

PART 2 29 MAY 1978

Trapped vortices in rotating flow. E. R. JOHNSON 209

The instabilities of finite-amplitude barotropic Rossby waves. RICHARD P. MIED 225

Experiments on buoyant-parcel motion and the generation of internal gravity waves. CARMEN P. CERASOLI 247

Inertial waves and an initial-value problem for a thin spherical rotating fluid shell. J. M. HUTHNANCE 273

Further thoughts on convective heat transport in a variable-viscosity fluid. JOHN R. BOOKER and KARL C. STENGEL *page* 289

The entrainment interface in a stratified fluid. L. R. WYATT 293

An experimental map of the internal structure of a vortex breakdown. J. H. FALER and S. LEIBOVICH 313

Scattering of Poincaré waves by an irregular coastline. Part 2. Multiple scattering. L. A. MYSAK and M. S. HOWE 337

Free convective heat transfer in a viscous incompressible fluid confined between a long vertical wavy wall and a parallel flat wall. K. VAJRAVELU and K. S. SASTRI 365

Instability of viscous axial flow in annuli having a rotating inner cylinder. N. GRAVAS and B. W. MARTIN 385

On the applicability of Howard's formula. L. ENGEVIK 395

PART 3 14 JUNE 1968

Measurement of high frequency capillary waves on steep gravity waves. JOHN H. CHANG, RICHARD N. WAGNER and HENRY C. YUEN 401

Long nonlinear internal waves in channels of arbitrary cross-section. R. H. J. GRIMSHAW 415

Thermal convection with spatially periodic boundary conditions: resonant wavelength excitation. R. E. KELLY and D. PAL 433

Free-surface breakdown in a rapidly rotating liquid. W. E. SCOTT 457

The uniform distortion of thermal and velocity mixing layers. J. F. KEFFER, J. G. KAWALL, J. C. R. HUNT and M. R. MAXEY 465

Ground effects on pressure fluctuations in the atmospheric boundary layer. M. M. GIBSON and B. E. LAUNDER 491

Statistical features of heat transfer in grid-generated turbulence: constant-gradient case. K. S. VENKATARAMANI and R. CHEVRAY 513

Measurements of turbulent flow downstream of a rearward-facing step. D. W. ETHERIDGE and P. H. KEMP 545

Intermittency effects in a numerical simulation of stationary three-dimensional turbulence. ERIC D. SIGGIA and G. S. PATTERSON 567

Absorption of sound by homogeneous turbulence. D. T. NOIR and A. R. GEORGE 593

PART 4 28 JUNE 1978

Study of three-dimensional unsteady Oseen flow. S. MURATA, Y. MIYAKE, Y. TSUJIMOTO and F. YAMAMOTO *page* 609

Non-Newtonian flow characteristics in a steady two-dimensional flow. THOMAS B. GATSKI and JOHN L. LUMLEY 623

Deformation and breakup of a single slender drop in an extensional flow. ANDREAS ACRIVOS and T. S. LO 641

The linear stability of the flow in a narrow spherical annulus. I. C. WALTON 673

On Itoh's finite amplitude stability theory for pipe flow. A. DAVEY 695

Fluid transport by cilia between parallel plates. N. LIRON 705

Stokes flow due to a Stokeslet in a pipe. N. LIRON and R. SHAHAR 727

Calculation of axisymmetric jets and wakes with a three-equation model of turbulence. SEDAT BIRINGEN 745

A depth-averaged mathematical model for the near field of side discharges into open-channel flow. J. J. MCGUIRK and W. RODI 761

Oblique instability of periodic waves in shallow water. P. J. BRYANT 783

CONTENTS TO VOLUME 88

PART 1 13 SEPTEMBER 1978

On two-dimensional magnetohydrodynamic turbulence. A. POUQUET *page* 1

The unsteady matched Stokes–Oseen solution for the flow past a sphere. MICHAEL BENTWICH and TOUVIA MILOH 17

A new model for nonlinear wind waves. Part 1. Physical model and experimental evidence. BRUCE M. LAKE and HENRY C. YUEN 33

Velocity-derivative skewness in small Reynolds number, nearly isotropic turbulence. S. TAVOULARIS, J. C. BENNETT and S. CORRSIN 63

Instability and transition of the axisymmetric wake of a slender body of revolution. LEIGH F. PETERSON and FRANCIS R. HAMA 71

Potential/complex-lamellar velocity decomposition and its relevance to turbulence. RONALD L. PANTON 97

On moderate injection into a separated supersonic boundary layer, with reattachment. C. DIVER and K. STEWARTSON 115

Intermittency and preferential transport of heat in a round jet. R. CHEVRAY and N. K. TUTU 133

Nonlinear resonant excitation of a long and narrow bay. STEVEN R. ROGERS and CHIANG C. MEI 161

Wave propagation in a viscoelastic tube containing a viscous fluid. SOL I. RUBINOW and JOSEPH B. KELLER 181

REVIEW

Stability of Fluid Motions, volumes 1 *and* 2, *by Daniel D. Joseph* 204

PART 2 27 SEPTEMBER 1978

Focusing of weak shock waves at an arête. M. S. CRAMER and A. R. SEEBASS 209

Experiments on the dynamics of a gravity current head. R. E. BRITTER and J. E. SIMPSON 223

On the nature of unsteady three-dimensional laminar boundary-layer separation. JAMES C. WILLIAMS 241

A model for the decay of a wall shock in a large abrupt area change. S. A. SLOAN and M. A. NETTLETON 259

Flow in a channel with pulsating walls. T. W. SECOMB 273

Radiation damping of inertial oscillations in the upper ocean. T. H. BELL 289

On solutions of the boundary-layer equations with algebraic decay. J. H. MERKIN 309

Asymptotic solutions of the Erdogan–Chatwin equation. RONALD SMITH 323

Flow in heated curved pipes. LUN-SHIN YAO and STANLEY A. BERGER 339

A strain-based Lagrangian-history turbulence theory. ROBERT H. KRAICHNAN and JACKSON R. HERRING 355

Time-dependent scaling relations and a cascade model of turbulence. Thomas L. Bell and Mark Nelkin *page* 369

The force on a small sphere in slow viscous flow. Donald A. Drew 393

Part 3 13 October 1978

The large-scale structure of unsteady self-similar rolled-up vortex sheets. D. I. Pullin 401

The turbulent concentration field of a methane jet. A. D. Birch, D. R. Brown, M. G. Dodson and J. R. Thomas 431

Coherent structures in coflowing jets and wakes. A. E. Perry and T. T. Lim 451

Entry flow in a heated straight tube. Lun-Shin Yao 465

Hydrodynamic propulsion by large amplitude oscillation of an airfoil with chordwise flexibility. J. Katz and D. Weihs 485

Acoustic emulsification. Part 1. The instability of the oil–water interface to form the initial droplets. M. K. Li and H. S. Fogler 499

Acoustic emulsification. Part 2. Breakup of the large primary oil droplets in a water medium. M. K. Li and H. S. Fogler 513

Note on the Faxén relations for a particle in Stokes flow. J. M. Rallison 529

On the power laws for turbulent jets, wakes and shearing layers and their relationship to the principle of marginal instability. Martin Lessen 535

Models of the scalar spectrum for turbulent advection. R. J. Hill 541

The development and structure of turbulent plane jets. K. W. Everitt and A. G. Robins 563

Structural similarity in radial correlations and spectra of longitudinal velocity fluctuations in pipe flow. K. J. Bullock, R. E. Cooper and F. H. Abernathy 585

Part 4 27 October 1978

Thermal transpiration in a circular capillary with a small temperature difference. B. T. Porodnov, A. N. Kulev and F. T. Tuchvetov 609

On internal gravity waves in an accelerating shear flow. S. A. Thorpe 623

Blast-wave propagation in a spray. T. H. Pierce 641

An experimental study of the decay of temperature fluctuations in grid-generated turbulence. Z. Warhaft and J. L. Lumley 659

Numerical study of pressure and velocity fluctuations in nearly isotropic turbulence. U. Schumann and G. S. Patterson 685

Numerical study of the return of axisymmetric turbulence to isotropy. U. Schumann and G. S. Patterson 711

The plane turbulent impinging jet. E. Gutmark, M. Wolfshtein and I. Wygnanski 737

Hydromagnetic Stokes flow past a rotating sphere. V. U. K. Sastry and K. V. Rama Rao *page* 757

Convection fluid dynamics in a model of a fault zone in the earth's crust. D. R. Kassoy and A. Zebib 769
